

What Can A Personal Financial Trainer Do For You?

Just as you may seek a personal fitness trainer to help you achieve your goals in the gym and obtain that beach ready body, a personal financial trainer can help you reach your financial goals and maintain a fit and buffed bank account.

I am offering a pure financial service for all people. Raw numbers to help you make an informed financial decision which will buff up your bank account.

Commitment, perseverance and routine achieve the results you wish for (not to forget a good trainer).

Businesses have “Profit and Loss Statements”, “Balance Sheets”, and “Cash Flow Projections” and “Budgets” prepared for them. With these reports businesses have an accurate measure of where they are at and what is expected.

But householders do not have this level of analysis undertaken. If they did, they would be able to map out their lifestyles and be prepared for life’s unexpected twists and turns.

Threats are dealt with well before they arrive. Threats are dealt with in a calm and rational manner with the emotion taken out of the action.

Opportunities are identified and worked towards. Once taken the opportunities are life changing events which transform people’s futures. What was a dream is slowly turning into a reality.

Not only will you be receiving pure financial advice which businesses use, you will also receive advice which minimises your tax exposure. Tax is a major factor which impacts on all financial decisions.

By minimising this exposure your personal wealth increases over a shorter time frame.

If you wish to discuss your personal financial position please do not hesitate to contact me and my dedicated team on (08) 7226 2142.

Yours faithfully,

John Stankevicius
